Hottub

Hot Tub (only available at the Wellness Eco-Lodges)

With the Balboa System, you have full control over the hot tub.

The heating system of the Hot Tub.

With a simple press of a button, you can set and maintain the water temperature. If the water temperature drops, the Balboa System automatically ensures it returns to the correct temperature.

Using the hot tub

- Children without a swimming diploma are only allowed access to the hot tub under parental supervision.
- Before entering the hot tub, we request that you take a shower. This way, you enter the hot tub completely clean, rinsing off any body lotion, hairspray, etc., to prevent the hot tub water from becoming cloudy.
- Once you are completely clean, walk to the hot tub in your slippers to avoid bringing dirt from the ground onto your feet.
- If you notice the water cooling down, you can easily increase the temperature using the buttons on the control panel.
- When you exit the hot tub, it's good to cool down. Start cooling at your wrists and feet, gradually cooling toward the heart. It's also important to drink enough water after using the hot tub. Consuming food and alcoholic beverages, as well as smoking or using an E-cigarette, is not allowed in the hot tub.

- A: Temperature up
B: Temperature down
C: Switch lamp on/off
